I'm a professional and team-oriented Fullstack Developer based in Poland. I'm well experienced in the newest Java 8+ and ecosystem, SQL, Linux, JavaScript and React. I use AI on a daily basis and know AI-Agentic best practices to extend my capabilities. I graduated in 2016 in Cracow and since then I constantly improve my tech and soft skills.

Work Experience

During 7 year-long career I had chance to work on Spring Boot microservices projects with some interludes on Frontend. In between the projects I traveled and invested time in well being. My domain knowledge includes Wealth Management, Banking, Air Booking Systems and Credit Products.

● Java Developer

08/2024 – 04/2025

Scalo for CRIF | Cracow, Polska

Modernization and documentation of complex credit delinquency managing applications.

- Transitioned microservices to Helm packages for deployment on OpenShift
- Rewrote queries for Microsoft SQL Server (half of them having > 50 lines)
- Fixed bugs related to application's state machine and concurrency in Java 21
- Supported team in documenting legacy algorithms
- Created proof of concept Liquibase for test containers

Tech: Java 21 · Spring Boot 3 · Kubernetes · SQL · Linux · Agile · Javascript · Angular · Docker · Hibernate · Helm · Canary Deployments · Git

● Cloud Engineer

08/2022 – 09/2023

Intel | Gdansk, Poland

Maintained Intel SGX Firmware Key management application. Wrote tests, fixed bugs in JavaScript, Java and C++.

- Represented company on OWASP Israel event placing 16th/100 attendees
- Helped rewrite Cassandra management tool from Python to Java
- Participated in day-to-day maintenance tasks and in code reviews

Tech: Java 8 · Linux · SQL · HTTP · REST · Agile · Node · Azure · Python · JavaScript · C++ · CMake · Domain Driven Design · Gradle · Git

● Software Developer

01/2022 – 05/2022

James Villas Holidays | Remote, Poland

Worked on Event Driven microservices application in Java 8 and Kafka.

- Guided Junior Developers in everyday tasks
- Extended and generalized core algorithm mapping properties to trees

- Implemented new endpoints in Kafka, Java, Avro schemas

Tech: Kafka · Https · Spring Boot · SQL · Linux · Java 8 · Avro · Serialization · RabbitMQ · MQTT · Git

- **Software Developer**

01/2021 – 11/2021

Sabre | Cracow, Poland

I participated in rewrite of Assembly based flight booking system to microservice architecture in Java

- Collaborated on writing new pieces of functionality based on disassembled pseudocode
- Prepared application for deployment to Google Cloud
- Fixed bugs and maintained existing functionality

Tech: Java 8 · Spring Boot · SQL · Agile · REST · HTTP · Assembly · C++ · Google Cloud Platform · Terraform · Python · Kubernetes · Linux · Docker · SOAP · Git

- **Software Developer**

06/2018 – 07/2020

HSBC | Cracow, Poland

Maintained internal integration platform in Spring Cloud and Java.

- Wrote SMS texting integration for new to bank clients
- Extended XML mapping functionality according to BA documents on JIRA
- Participated in code reviews
- Participated in maintenance and frequent deployments

Tech: Spring Boot · Java 8 · Spring Cloud · Google Cloud Platform · Agile · REST · Linux · Docker · Git · Transactions · JTA

- **Software Developer**

04/2016 – 05/2017

UBS | Cracow, Poland

I maintained, fixed bugs and extended internal application for bank's traders

- Worked with Spring, Hazelcast, Cucumber, and Java
- Filled in for departing frontend developers for 5 months
- Successfully led recruitment for React positions, resulting in hiring new candidates

Tech: Spring Boot · Java 8 · Hibernate · SQL · Agile · REST · Linux · Hazelcast · JavaScript · React · Caching · Transactions

Education

Master of Science, Computer Science

09/2016

AGH University of Science and Technology | Cracow, Poland

Extracurricular Activities

- Credly Profile: credly.com/users/dominik-gawlik
- OWASP Israel 2024 attendance
- Certificate Goethe Institute B1 German
